jack.hogan99@gmail.com
johnhogancodes.com

Motivated software engineer ready to take on challenging roles and solve complex problems. Primarily interested in front end development but open to broadening my skillset. Skilled in software development, managing projects, user documentation, and software testing.

PROJECT EXPERIENCE

Worlds Wisdom Website - capstone project

Worked closely to include the founder of the sponsor company and their technology team. Realized their vision for a website that shares and stores wisdom and stories. Learned new skills in coding and communication and how to excel in a realistic work environment.

Skills: **React, Team cohesion, Front end**

Web crawler

Managed and developed an efficient web crawler with search engine capabilities. This project used many different information retrieval techniques and was completed in python.

Skills: **Python, Text parsing, Data analysis**

Portfolio Website - johnhogancodes.com

Designed, coded, and deployed a portfolio website that showcases my knowledge of basic web design concepts

Skills: **Html, CSS, Mobile-friendly design**
